

Specialist Building Services Structural and Concrete Repairs

Providing a Professional and Caring Service for 30 years

Ivor Parnham Building Services Limited was formed in 1982 and is based in the Midlands.

About Us:

Ivor Parnham carries out specialist building services, structural concrete repair works, site management services and condition surveys. Ivor Parnham can undertake various projects from concrete and structural repairs on motorway bridges and high rise buildings to prestigious historical buildings along with many other unusual projects.

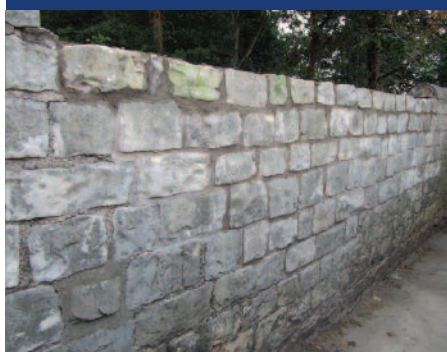

Working Nationwide we pride ourselves on giving a professional, efficient and highly personalised service.

No job is too small or too difficult and as our reputation has grown we have continued to trade successfully with a large client base including Local Authorities, Hotel Groups, and Property companies.

We are associates of the BRE (Building Research Establishment).

Ivor Parnham can undertake various projects from concrete and structural repairs on motorway bridges and high rise buildings to prestigious historical buildings along with many other unusual projects.

Historical buildings such as the one shown above have benefited from Ivor Parnham's specialist building services.

Concrete Repairs:

Parnham Building Services Ltd are very experienced in the specialist repair of concrete structures and we have carried out concrete repairs on numerous structures including bridges, car parks, hotels, high rise flats and culverts. We work to the European Standards EN1504 and to meet the client's requirements. We select the appropriate repair principles and then the best method of achieving each principle.

Repair methods we use include pumping flowable concrete into purpose made formwork, resin injection of cracks, grout pumping, hand application of resin and cementitious mortars. We also apply protective surface coatings, waterproofing, corrosion inhibitors and concrete joint sealants.

We pride ourselves on selecting and sourcing the best quality products and always adhering to the manufacturer's specifications and guidelines to obtain the best solution and finish for each job.

Ivor Parnham has wide ranging expertise, knowledge and experience in all types of concrete repairs and have even had the opportunity to renovate "Tardis-style" precast concrete Police Boxes built in the 1930s which are Grade II listed.

Our experience extends to carrying out repairs to concrete floors in cold rooms and freezer stores working at temperatures as low as -30°. This enables the client's business to remain in operation, eliminating the need to warm up the slab.

Structural Repairs:

Ivor Parnham Building Services Ltd are experienced and specialise in various forms of structural repair techniques which are often urgently required on a property or structure to bring it up to the required health and safety standards or simply just to make it safe for members of the public.

These works can often follow on from in-depth structural investigations, carried out in conjunction with a structural engineer.

Structural repairs are often required for a great many reasons including ground movement, inadequately restrained walls. Movement due to water ingress and/or timber decay, failed lintels or building materials, movement fatigue or mechanical impact.

Some of the repair techniques that we can carry out may include the use of Structural wall ties and restrains, embedded wall stitching, strapping, structural pinning and resin bonding or resin beam repairs.

Safety:

At Ivor Parnham Building Services Ltd we take Health and Safety very seriously and are proud of our attitude, commitment and proven safety track record.

We also ensure that all our members of staff receive training on health and safety to assist them in undertaking their tasks safely and efficiently.

External courses on specific subjects may be utilised along with internal training. Our workforce undergoes specific induction training prior to any new works starting, in order to address the health and safety hazards associated with that particular project.

We ensure close co-operation among everyone involved in a project to help prevent injury and ill-health and we work closely with the client or owner to meet our responsibilities for site safety.
